

## Net Energy Metering (NEM) Program

**Applicability:** Customers enrolled in PG&E's Net Energy Metering program (PG&E NEM) are automatically enrolled in KCCP's NEM Program (KCCP NEM).

**Rates:** When a KCCP NEM Customer's system produces energy in excess of a KCCP NEM Customer's usage, the excess generation will be tracked in a credit bank and will be eligible for an annual Cash-Out of the total accumulated excess generation at PG&E's Net Surplus Compensation (NSC) rate. When a KCCP NEM Customer consumes energy in excess of the KCCP NEM Customer's system production, the excess consumption will be charged at the rate indicated by the KCCP NEM customer's OAS<sup>1</sup>. All other charges under the KCCP NEM Customer's OAS continue to apply, including PG&E charges. Please contact PG&E for the terms and conditions of the PG&E's NEM program.

**Billing:** KCCP nets all of a KCCP NEM Customer's energy consumption and generation on a monthly basis (Monthly Settlement). For Monthly Settlements that result in a net usage credit, the credit will be tracked in a credit bank. For Monthly Settlements that result in a net charge, the amount of the net charge will be assessed and payable for the corresponding billing period.

**Cash-Out:** In July of each year, or if KCCP service is terminated, if a KCCP NEM customer's total credit balance is over \$100, KCCP will mail a check for credit balances up to \$5000 to the account address. Payments in excess of \$5000 are subject to KCCP approval.
